[Music: S. Drover, G. Drover]

[Lyrics: S. Drover]

Checking the engines - all things are in place  
Strapped down the countdown's begun  
Lift-off in flames - smoke is filling the sky  
Arrival to countdown is done  
May god be with us - now splitting the sky  
Launching our way into space

Many - failed to pass the test  
Can't attain - illusive

Expanding horizons - a leap for mankind  
Mission is set and in place  
Drifting through masses of binary stars  
Solar flares beaming with light  
Radar detection - incredulous site  
The black hole - approaching in space

Many - failed to pass the test  
Can't attain - illusive

[Solo]

[1st section - Andy]

[2nd section - Glen]

Mission control has detected - encourage  
To alter the plan - it's too late  
Sucking our spacecraft in forbidden blackness  
Components malfunction - now frayed  
Losing all contact with mission control  
1000 light years from home

Many failed to pass the test  
The black hole - illusive
