Spontaneous jugular penetration  
Impulsive random carnage  
Serrated blades sever spinal nerves  
Grinding between vertebrae  
Gashing veins, Slashing violently  
Furiously ripping loose hanging flesh  
From a shredded and disfigured neck  
Disconnecting tendons  
Choking and Gargling as your windpipe is crushed  
Crude lobotomy, cranial contents emptied  
Spilling into an abominable heap  
Of sickening cerebral viscera  
Potent flatulence erupts  
Preparing for explosive release  
Intestines churning and gurgling with anticipation  
Distended bowels void  
Anally disgorging excrement  
Splattering and painting your head with shit  
Imbued in sewage  
Dysentery drenches the severed appendage  
Climactic sposmosic surges permeate anterior cavities  
Cutting and stripping off your face  
To wipe away the repugnant waste  
Your skin becomes a useless rag  
Your skull becomes my septic tank
