I burn for you  
I can't breath without you  
You forgive because you love  
I fall for you  
I can no longer stand up without you  
You understand because you love

What is the sun without your light  
What is a picture without your face  
I have cursed life  
I have tried to live alone  
But I can't

Without you I can't be free  
Without you I can't be endlessly high  
Without you I am alone  
Without you I can't fly  
Without you I can't endlessly love  
Without you I cannot be

I awake for you  
I can't feel anything without you  
You liberate you forgive  
I drown in you  
I feel your heart beat deep in me  
You understand because you love

I pray to God that this never ends  
That your fire will dazzle me forever  
I miss you, I count every second  
Without your mercy I will go under
