

## **Eken Is Dead "Condition"**

Visit "[Condition](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Today I'm scarred and weak  
Unaware of the outside world  
My muscles don't work the same  
It's been four days since I've seen the sun

I don't want to even move  
I want out, I want out, I want out of this place  
I can't take my own face  
Someone cure my condition  
I don't know my own mission

The mirror's my enemy  
Don't even know what day it is  
Life's dragging on and on  
Another day to remind me I am wrong  
I don't want to even move

I don't want to even move  
I want out, I want out, I want out of this place  
I can't take my own face  
Someone cure my condition  
I don't know my own mission

I'm locked in, I can't get out  
Do I need help if I can't help myself through
