

Eken Is Dead

"The Glue"

Visit "[The Glue](#)" on MotoLyrics.com

Sometimes you try to live life the right way
Sometimes it just takes that person to show you
Sometimes you just need motivation and inspiration
Sometimes you find it's standing right in front of you
They say in times of prosperity our friends know us
But in times of adversity we know our friends

You are the glue that holds us all together
You are cement and you'll keep us from falling apart
We'll do our best to carry on your proud name
Because we know if it was one of us you'd do the same

You always brought out the best in people and of
course myself
Only your heart was big enough to hold us all so close
We will try to emulate you from this point on
We know you would have found a positive in this
situation

You are the glue that holds us all together
You are cement and you'll keep us from falling apart
We'll do our best to carry on your proud name
Because we know if it was one of us you'd do the same

We know there were many goals that you wanted to
fulfill
But we know that you did more than some have in a full
life
Your spirit is always on our mind, forever in our heart
This song is for you Dan and for people to be inspired
by you

You are the glue that holds us all together
You are cement and you'll keep us from falling apart
We'll do our best to carry on your proud name
Because we know if it was one of us you'd do the same
