Well here go, my big plans
To build up this fortress up into the clouds
It's made up of my love and my heart and my blood
We'll make it out

Here I stand, with the weight of the world?
Can I stand, with the weight of the world
Here I stand, with the weight of the world?
Can I stand, with the weight of the world

Oh, And this is all I've got
I'll make it now or not
It's made up of my love
I've fought so hard to fade
Our lives are meant to make
It's made up of my love,
Made up of my love
That's how it goes, it goes!

Well here go, my big plans
To build up this fortress up into the clouds
It's made up of my love and my heart and my blood
We'll make it out

I won't fall down, my heart still pounds
I'm breathing now, I won't fall down
I won't fall down, my heart still pounds
I'm breathing now, I won't fall down

Well here go, my big plans
To build up this fortress into the clouds
It's made up of my love and my heart and my blood
We'll make it out
Alright you're not the only one.
