I am the puppeteer  
the lord of string  
a king controll  
See how my fingers sweep

I carry the master key  
I stear the nervecenter  
I am the well of thirst  
I am the cell of birth

So you're now my heroine  
I wish you well  
I wish you everything

I am the pilot of rain  
A virus insane  
A moodconstructor  
A sad seductor

I make you my heroine  
my rush of adrenaline  
we dance in silense  
ignoring the violence

So you're now my heroine  
I wish you well  
I wish you everything

I am the pilot as we fly  
(I will wave the last goodbye)  
you're the passanger by my side

So you're now my heroine  
I wish you well  
I wish you everything
