Ra ra ra ra, ohhh
Hooo, huuu.

Just a thought of you, be with someone else,
That will never do, want you for myself,
Girl, what we've been through,
Baby, me and you, guess we never knew who turned
out to be who.

[Chorus:]

Cause when I see you, I just die, girl
I can't explain and my heart stops
Without you, in my life, girl, the feeling takes me away,
When I see you, I come alive, girl
I never wanna be with somebody new in my life girl,
And that's the way that I feel when I see you, you, you.

No more loneliness, no more emptiness,
Tell I love you strong, let's hold on to this,
I will cherish you, let me shelter to you,
And I promise you, all your dreams will come true.

[Chorus:]

Cause when I see you, I just die, girl
I can't explain and my heart stops
Without you, in my life, girl, the feeling takes me away,
When I see you, I come alive, girl
I never wanna be with somebody new in my life girl,
And that's the way that I feel when I see you girl.

I never felt this much about anything,
Girl you know you got me good, you got me goin'
insane,
I see traces of your faces in the strangest of places,
It doesn't matter what I do.

[Chorus:]

Cause when I see you, I just die, girl
I can't explain and my heart stops
Without you, in my life, girl, the feeling takes me away,
When I see you, I come alive, girl

I never wanna be with somebody new in my life girl,
And that's the way that I feel when I see you girl.

It's funny how all this time and all that we've been
through

Gets better, and better, I love you forever,
Baby you never know who turns out to be true
From spring to September, I'll always remember,
It's funny how all this time and all that we've been
through

Yeah, it gets better and better, I love you forever
Baby I never thought it turn out to be you
After all that we've been through, I'm still in love with
you.

When I see you, girl, I just die, girl,
'Cause when I see you, girl I just die, girl,
When I see you, I just die, girl.
