They said that I can't change without you
That I can't change without you
That I can't change without you

Those nights I can't sleep, I'm stuck here
Lost in your dreams (I'm stuck in here)
Like why can't I get much better?
Like why can't I get much better?

So swipe it, and take it away
And never, never lie to me
So swipe it, and take it away
And never, never lie to me

The only reason my eyes close
Is so they open with you by my side
Like why can't I get much better?
Like why can't I get much better?

So swipe it, and take it away
And never, never lie to me
So swipe it, and take it away
And never, never lie to me

I won't wait for....
Wait for, wait for...
I won't wait for tomorrow

So open your eyes my darling
Today's a new day (Like why can't I?)
Like why can't I get much better?
Like why can't I get much better?
Like why can't I....
Like why can't I get better?
