Leave me, in my sweet misery
'Cause I'd rather be alone than chase you around all
the time
'Cause you know, darling and darling I know
You should find something better
And do what you want with your life
And tell who you want, that you found light

[Chorus:]
I think I'll just fade away
Float like a feather
Be deranged like the rain
Toss and turn like the weather
I think I'll just fade away
Float like a feather
Be deranged like the rain
Toss and turn like the weather
And maybe I'll take a while
To miss you

So forgive me, I honestly don't mean to be confused
Although I'd like to think
I've been a little misused
And so I guess I shouldn't really care
If I win or lose, but it's good to know
I'll let you be the one to choose
So do what you want with your life
And tell who you want, that you found light

[Chorus]
