Monkey have spread a plague,
From a little bite.
People were using drugs, and a free fuck for all.
People never thought sex would become death.

Chorus: In the plague of death,
AIDS will kill you,
and we see tears,
Into the shadows of death

First it was a drugies (either drugie or drugie's) and a
homosexual disease,
But promiscuous people began dying in numbers,

Wrap it up before the plague will ("can" makes more
sense) kill you,
People will die soon soon (-a soon),

Chorus

clean vocal part: Angry and in pain,
Insane decay,
In this fucking heartless world,
people were passing out,
striving from the sky, (what?)
Is there no fucking end,
as it comes for you.

chorus

end
