Now it's time to think and open our minds  
Living every day like the last the last one of our life  
Somewhere it always rains somewhere it never does  
The earth is going down  
Gases are floating high in the air  
Up in the stratosphere  
Coating all our dreams and all our hopes  
CFC's rising

IN OUR SKIES NOW WE CAN SEE  
A CHEMICAL REACTION NOT IN OUR MINDS  
A CHEMICAL REACTION THAT'LL CHANGE OUR LIVES  
A VORTEX OF DISASTERS SHOULD MAKE US THINK

UV rays come down warming the globe  
The temperature is rising and the oceans will grow  
So many rainy days in some lands  
In other drought is striking  
Gases are floating high in the air  
Up in the stratosphere  
Coating all our dreams and all our hopes  
CFC's rising

IN OUR SKIES NOW WE CAN SEE  
A CHEMICAL REACTION NOT IN OUR MINDS  
A CHEMICAL REACTION THAT'LL CHANGE OUR LIVES  
A VORTEX OF DISASTERS SHOULD MAKE US THINK

[Solos: Eugene]

Maybe it's too late. too late ti change the tide  
Maybe it's too late to read the future

IN OUR SKIES NOW WE CAN SEE  
A CHEMICAL REACTION NOT IN OUR MINDS  
A CHEMICAL REACTION THAT'LL CHANGE OUR LIVES  
A VORTEX OF DISASTERS SHOULD MAKE US THINK  
LET'S MAKE IT END
