Back down! From trying to tell me how to live but never  
ever tell me what to do  
Get off! You put your hands in my existence and im  
really getting sick of you  
Sit down! Im just a little hard to handle till you find out  
where im coming from  
Get out! You get a little more decisive but you maybe  
love what i become

chorus

I can't stand the threat of  
Your neurotic pleasures (4x)

Get up! And tell me what you really want ill give you  
pleasure till you start to bleed  
Shut up! My way of life is what you want but my nuts is  
what you really need  
Look out! Im just another step behind you and im  
coming up loud and fast  
No doubt! You try to beat me at the game but hey your  
only living in your past

chorus

So this is what you want  
So this is what you need  
I didn't come to fall  
I didn't come to bleed  
It took a little push  
It took a little shove  
But it was all i took  
Of your neurotic love!!

chorus (2x)
