Cut off the light
Take a look
There's nothing beyond but pain
Suffer in the deepest void
The flame of hope is gone
What have I done?
Denied the father and the sun
For a moment it seemed
There's space beyond the spheres

Aflame the night
So clear and bright
Unstable light
You've been sacrificed in fear
Now there's one thing for sure
I'm not afraid anymore

Day after day we've been fixed in the bowl
For so long
For ages we're captured in shells
And crystallized walls
Predestined or punished?
By man or god?

I cannot, I will not
Deny it's false innocence
I cannot, I will not
The age of false innocence
Take it away from me

For a while
Astronomy has moved the earth
And we've turned around the sun
Sanctum officium
Has made me believe
Has made me believe
Has made me believe
