

## **Electric Six "I Invented The Night"**

Visit "[I Invented The Night](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Hey little kitty  
With your tail dragging on the floor  
You could have a following in every town that you go  
But you remember what you said to me  
That you are nothing without me

'Cause I invented the night  
Yeah, I invented the night  
In my laboratory using lust and lies

Hey little birdie fly until your wings desert you  
And when you come down, come down on me  
'Cause you know I will never hurt you  
But maybe once or twice I'll ruffle your feathers  
'Cause you said we should always be together

'Cause I invented the night  
Yeah, I invented the night  
Mixing elements of the strangest kind

And should your invention be destroyed in a fire  
John, it's only Monday  
I gave you Tuesday night and Wednesday night and  
Friday night  
The weekend is a sea of electric light  
Turn it on

Hey little doggy  
Always looking for a bigger bone  
Try to see how many times that you can run away from  
home  
But in the end you always come back to me  
'Cause you are nothing without me

'Cause I invented the night  
Yeah, I invented the night  
Mixing elements of the strangest kind
