The greatest conspiracy ever, which we are all part of... - They're manipulating our food , not to make us stronger - Or healthier, but to increase the profits of shareholders - Who probably wouldn't even eat their products - They're also playing with other people's food - To control their economy, up and down as they wish - Because vital needs are something to exploit easily - So what will happen to us? Who knows, even them don't... - We are part of this living experiment - A long-term research to synthesize nature - Are you? It's your choice, it's for life: EAT ORGANIC
