I need a miracle
To fall in love
I need a miracle
Well there she goes
The whole world knows I want her
But I know I need her
Cause she's a miracle

Take a million girls and line them up against the wall
Even if they're majorettes I wouldn't care at all
Put a million flowers in their hair and make them smile
I know not one would be the girl I need tonight

I need a miracle, to fall in love
I need a miracle, well there she goes
The whole world knows I want her but I know I need her
Cause she's a miracle

Take a million girls and line them up against a wall
Boys with one thing on their mind won't help them girls
at all
Put a million flowers in their hair and make them smile
I know that what I need is all your love tonight

I need a miracle, to fall in love
I need a miracle, well there she goes
The whole world knows I want her but I know I need her
Cause I need a miracle

Hurry, cause tonight's the night I'm thinking of
Hurry, cause tonight's the night I feel it in my bones

I need a miracle, to fall in love
I need a miracle, well there she goes
The whole world knows I want her but I know I need her
Cause she's a miracle
She's a miracle
