"Under The Ocean"

Visit "[Under The Ocean](#)" on [MotoLyrics.com](#)

You and me, we found a way under the ocean
As we're dancing, read my silence
Make it poetry in motion
So carefully when you say to me

If we only had a day, by morning they'd know
We made a way to be better than the last
If they could hear you today, how perfect you say
We made a way to be better than the last

In the dark, my pulse is chasing my emotion
Step back from the shadowed skyline
Burning eyes cause an explosion
So carefully when you say to me

If we only had a day, by morning they'd know
We made a way to be better than the last
If they could hear you today, how perfect you say
We made a way to be better, much better

I'm dazzled by you, I'm dazzled by you
I retrace the way I, I, oh, I feel you
Retracing you, I'm dazzled by you
I have you

If we only had a day, by morning they'd know
We made a way to be better than the last
If they could hear you today, how perfect you say
We made a way to be better, much better

If we only had a day, by morning they'd know
We made a way to be better than the last
If they could hear you today, how perfect you say
We made a way to be better, much better than the last
