Three is a magic number
Yes it is, it's a magic number
Somewhere in that ancient, mystic trinity
You'll get 3 as a magic number

In the past, in the present, in the future
Faith and hope and charity
The heart and the brain and the body
will give you 3 as a magic number

It takes 3 legs to make a tripod
or to make a table stand
It takes 3 wheels to make a vehicle
called a tricycle

And every triangle has 3 corners
Every triangle has 3 sides
No more, no less, you don't have to guess
When it's 3 you can see - it's a magic number

And that's a magic number
A man and a woman had a little baby
Yes, they did - there were 3 in the family
And that's a magic number

3-6-9, 12-15-18, 21-24-27, 30

3-6-9, 12-15-18, 21-24-27, 30

Multiples of three, come up 3 times in each side of ten

In the first 10 you get 3, 6, 9
Beneath the -teen stand you get 12, 15 and 18
and in the 20s you get up, get up 21, 24, 27
and it comes out even on 30

Multiply backwards from three times ten:
Three time ten is 30, three times nine is 27
Three times eight is 24, three times seven is 21

Three times six is 18, three times five is 15

Three times four is 12
and three times three is 9
and three times two is 6
and three times one is 3 of course

3 is a magic number
Yes it is, it's a magic number
3 is a magic number
3 is a magic number
It's 3 of course
