

Eleventyseven "Nostalgia-topia"

Visit "[Nostalgia-topia](#)" on MotoLyrics.com

We could take this road to nowhere in my '89 and floor
it through state lines and we'll reach our
destination whatever it might be as long as you don't
leave

Cause I don't ever want to slow this down everything
I've ever wanted has been found we could drive into
the future with our memories holding on to all we
believe

We could through away our cell phones and only
answer calls coming from the stars we could catch a

drive-in movies and let the hours pass cause nothing
perfect can last can last

[chorus]

Cause I don't ever want to slow this down everything
I've ever wanted has been found we could drive into
the future with our memories holding on to how things
used to be
