The road full of light

I have mine full of desire

In all, in all of the world

There is a big mountain

Full of green daffodils

Swimming in the coldest part of spring

In light, in light of it all

It comes pouring

Some going this way and others that

And straight down the track, you can hear 'em all  
falling

In light of it all

I have mine

Full of desire

In light of it all

I have gone
