I watch the leaves fall to the ground
Suddenly we belled the sun
I carry on the season down
As time's sarander then to now
They said nothings go chemister
But hope will fade away
This is only that I can dream I know
When winter went go very spring We Know
And that's the life inside all me
This is all that I can dream

The sun will say I am moving rise
Now I did expord the simple lines
The stars brights before my eyes
Never mind it in my life
This is only that I can dream I know
When winter went to spring we know

And that's the life inside all me
This is all that I can dream

I close my eyes make a wish
What the way go heres from there's
All I need is a room and the time my through
Like a girl always in the green
And this is only that I can dream I know
When winter went to spring we know
And that's the life inside all me
This is all I can dream

This is only that I can dream I'll show
This is no one that it's heart can go
We ever faces is there hopely
This is only that I can dream
