Ten thousand streams and a one day-trial
Can't stand the strain pushing me to plunge
Look how the tide embraces wings
Down that river
To a sea of walking dreams
Down that river
Stop the world, I leave
Free-crime, I shoot the stars

Fireworks matching the day where nothing else goes
Blow your mind and remain where nothing else goes
Bleed your heart to the day where nothing else goes on

Sometimes I dream I can shoot the stars
Light up the fireworks and guide the time
Look how the tide embraces wings
Down that river
Stop the world, I leave
Free-crime, I shoot the stars

Fireworks matching the day where nothing else goes
Blow your mind and remain where nothing else goes
Bleed your heart to the day where nothing else goes
Standing still in the parade
Where nothing else goes on

Quiz question now:
When reality ends
Where do you want to be when you start dreaming?
I'm driving faster still to the place where I should
Not be
And stars are all over me

Fireworks matching the day where nothing else goes
Blow your mind and remain where nothing else goes
Bleed your heart to the day where nothing else goes
Standing still in the parade
Where nothing else goes on
