Your mouth is click, click, clicking
And I watch you blow
Your eyes are red and angry
And your head says time to explode

And I know that time will bring you down
Your angry and it shows
Your life falls a different way
Your on your tippy toes
And it shows
And it shows
And it shows

Your head is tick, tick, ticking
And you can't stop sniffin your nose
You pull out empty pockets
And I watch you wonder where you should go

Cause I know that time will bring you down
Your angry and it shows
Your life falls a different way
Your on your tippy toes
And it shows
And it shows
And it shows
And it shows
And it shows
And it shows

Time will bring you down
Your angry and it shows
Your life turns out a different way
Your on your tippy toes
And it shows
And it shows
And it shows
And it shows
And it shows
And it shows
