Every star,
In the sky I give to you.
Every man,
Out of all of them I live for you.
Every life,
If you count them up,
That's how much I love you.

Babby can't you see this?
When your near me,
I just wanna kiss your lips.
When you touch me,
I just wanna touch you back,

Can't you see now,
Your all I need to have.
Babby when I feel you here,
I know it's where you'll stay.

I can openen my eyes
And see how you hold me.
I count every breath that's taken from me
But I don't care cuz there all for you
Well I'm holdin back,
We're talkin faster
And not long after
We found laughter again
Then we found love

Every star,
In the sky I give them all to you.
Every man,
Oh you know out of all of them I live for you.
Oh... and evey life,
If you count them up,
That's how much I love you.
And every life every single one
That's how much I will and always have
Love you...
