You and i will never be apart, apart  
You will never erase from my heart, my heart  
The distance can't belie  
The only hope i have inside  
Now you do what you do  
I'll do what i do  
I can't stop dreaming of you

(chorus)

I want you to be here  
I want it to be now  
I want you to be here  
I want it to be now  
I want you to be here, here, here, here, here, here  
I want it to be now, now, now, now, now, now

I want you to be here, here, here, here, here, here  
I want it to be now, now, now, now, now, now

I remember the day that you walked away from me,  
from me  
I hate to remember the day you walked away from me,  
from me  
What you said to me the other day  
Was enough to make me feel okay  
But i just want to reach you now  
And i don't know how

Chorus
