Lover come close to me,
I wanna feel you and touch you all over.
This will be so special, we'll be free,
Forever, my sweet love, we will hover.

I feel your breath, I smell your smell,
My lips and your lips don't miss their aim.
I feel your hands with every cell
Of my body, hear you whisper my name.

Let's love, let's feel,
Let's move, let's cry,
Let's dream, make it real,
Let's breathe, let's die!

Let's love, let's feel,
Let's move, let's cry,
Let's dream, make it real,
Let's breathe, let's die!

I'm trembling, can't stand it to wait any longer,
You're moving so slowly, I hold my breath.
Your and my body so close together,
Oh, nothing will stop us besides our death.

I'm losing control and so do you.
Only rhythm and breathing and heat.
Let's cry out now and never feel blue,
Never wake up because this dream is so sweet.

Let's love, let's feel,
Let's move, let's cry,
Let's dream, make it real,
Let's breathe, let's die!

Let's love, let's feel,
Let's move, let's cry,
Let's dream, make it real,
Let's breathe, let's die!
