You're not alone  
There're other people like you  
And you're the one  
I think about when I'm alone  
It's never that easy with you

It's getting dark  
And I'm anticipating  
I'm out of luck  
'coz I'm still waiting for you  
I wish we could see this through

You make, you make me feel so strong  
When I'm down  
They know one day  
I'll see you around

So here we are  
We're going nowhere special  
So here we are  
The answer to your question  
So here we are  
Don't leave me here  
Last time you left me hanging  
That's what life is  
And my ansesteral meaning  
So here we are  
And I'm not leaving 'til you say  
That I'll be yours tonight

So here we are  
It is too complicated  
We've come so far  
So turn the page  
Just stay the same  
People remain  
So can't you see that  
We're all to blame

1,2,3,4

She screams  
She screams her name out loud  
Into the night  
(Into the night)  
That's when one day I know she'll be mine

So here we are  
We're going nowhere special  
So here we are  
The answer to your question  
So here we are  
Don't leave me here  
Last time you left me hanging  
That's what life is  
And my ansesteral meaning  
So here we are  
And I'm not leaving 'til you say  
That I'll be yours tonight

So here we are  
(So here we are)  
We're going nowhere special  
So here we are  
(So here we are)  
The answer to your question

So here we are  
Don't leave me here  
Last time you left me hanging  
That's what life is  
And my ansesteral meaning  
So here we are  
And I'm not leaving 'til you say  
That I'll be yours tonight
