you feel around what they say you try to walk right  
down to this world dreams under cost what they say  
you try to walk right down to this world kissed lovers  
lost what they say you try to walk right down to this  
world you're sold boxed and locked on time lips locked  
and lined is what they say you try to walk right down to  
this world suits under line what they say as and i clearly  
walk right down to this world to talk to you one last time  
tin covered call is mine with clicks from the rusted line  
sin colored call is mine delivered on other side butn  
down the river feel i divorce your kind then i just burn  
down the river feel i divorce your kind feel i default on  
myself feel ive got to divorce some kind feel across  
myself then i finally wake up and i finally found your  
kind then i sit silent for some time when i just butn  
down the river then i sit silent for some time
