When the rain falls down, you won't feel a drop  
I'll talk to the clouds and they'll stop, chasing after you,  
Because (that's what you do)

And when your heart feels like its just about to break  
I'll hold it together babe.  
I will be the glue  
Because (that's what you do)

If your weak, I'll be strong  
If its dark, I will bring the sun, to shine on your day.  
Because

That's what you do when you love someone (that's what  
you do)  
That's what you do when you care that much (that's  
what you do)  
I'll be there, ready to fight, willing to die for you  
It's not that complicated  
That's what you do.

If you ever feel your not beautiful (you are wrong)  
I'll show you that you are girl, molded perfectly  
From your head down to your feet.  
And if you ever you feel like your all alone  
My arms will let you know, you couldn't be more wrong.  
Cause I'll be holding on

If your lost, you'll be found  
When it's crazy, I'll calm the whole world down.  
Just to see you smile again.

That's what you do when you love someone (that's what  
you do)  
That's what you do when you care that much (that's  
what you do)  
I'll be there, ready to fight, willing to die for you  
It's not that complicated  
That's what you do.
