And I should've never said that even though I thought it
before I spoke
And I should've never said that and now I know you
don't wanna hear about it
And I should've never said that. It sounded better in my
head.
And I should've never said that at all...at all
And I should've never said that so thanks for
understanding
And I should've never said that
And if it'll make you feel any better to talk about it
Just don't expect me to do the same
Some of these things I try to forget and talking about it
doesn't help
By all means, if it'll make you more at ease to cry a
little, let it out
So let's not talk about them because I could care less
about what they did
Let's not talk about them
See these conversations on the war of winning so we
won't bring them up again
Some of these things I try to forget and talking about it
doesn't help
By all means, if it'll make you more at ease to cry a
little, let it out...let it out (let it out)
Let it out...
Some of these things I try to forget and talking about it
doesn't help
By all means, if it'll make you at more ease to cry a
little, let it out...let it out, let it out
Let it out...
