sunbeams dancing in your mind
blue larks embracing sunlight..... sunlight.... sunlight
lotus of petals glistening
cool shade of wise trees listening
dawn of light lies between silence
chased amid fusions of wonder
revealing corridors of time
pictures of redescending distance
love colours sent within us
our endless caress for freedom
dawn of light lies between silence
chased amid fusions of wonder
revealing corridors of time
pictures of redescending distance
love colours sent within us
our endless caress for freedom
