My carriage and force are arising from dangerous
cause
The darkness recedes from my feet turning cold air
into heat
My skin becomes more hot and dry my weapons behind
my eye
The ? high up and fuses somewhere in the sky
Who would be dying by flashing and crashing through
the time
Flashes cross the sky that's moving up and down
needs the islands eye
Who will wear the crown
Shadows take my hand to draw me in the sand that's
covering my feet one
Word we need
Night we saw the light appearing out of night I cry we
start to fight
Start to fight no, no
Frightened by my foes I chase you at the source don't
hide behind
Doors no challenge I'm here I laugh at your fear
Night we saw the light appearing out of night I cry we
start to fight
Start to fight no, no
Frightened by my foes I chase you at the source don't
hide behind
Doors no challenge I'm here I laugh at your fear
We will lose all our roots in hate destroying the gate
That will lead us to mental force we extinguish the
source
Why do murder point all roots of all live in ?
Now my feet I could ? the ? my only hopes are gone
Creation isn't ? like creators ? as the scriptures ?
The nature of man does not understand
Vibrations existing in his real land
My mind did change I saw life in ?
But when knowing that I that I've got to live again
Vibrations of force ? source of living and dying of
every cause
