"The Challenge"

Visit "[The Challenge](#)" on MotoLyrics.com

Madness prevails
Chaos abounds
All power fail
Seeps through the ground
No rescue in sight
Confusion all day
Fears deep inside
Skies tuned in grey

We'll aware of our awful state
Won't be going down
We aspire to change it all
And regain the crown

News of the day
Worry the mind
Silent decay
Creeps from behind
Addicted to screens
Adoring machines
Surrounded by
A fatal scene

We stand tall in the maze of time
Face the challenge now
Try to escape our deadly fate
Managing somehow

CHOIR:
Our legacy
Fades and melts away
But we'll never
Simply let it be
Passed our rise and fall
Now we heed a call

We're approaching
The challenge of our time

Bad news every day
Shaking the mind

No place to stay // No hideaway
Suggestions insane
Temptations all day
Steered by the same
Who led us astray

We stand tall in the maze of time
Face the challenge now
Try to escape our deadly fate
Managing somehow

CHOIR:

Our century
Of insanity
Wasted values
Of society
Rising energy
Banned anxiety
Leading visions
To reality
Pride and vanity
Insincerity
Will we ever
Find a better way?
Passed our rise and fall
Now we heed a call
We're approaching
The challenge of our time
