"The Light From Deep Darkness"

Visit "[The Light From Deep Darkness](#)" on MotoLyrics.com

Out of the depth of nothing
In nobobdy's time
The earth was created
The first morning starts
Sun appears in the sky
Winds stroking waves
Evening shadows tumble down
Eclipse the sun of life
Herald the night
Burning lights arise
People take their places
Dance a merry round
They live without fear
Help each other in their way through life
Tomorrow we'll see
They forget life's goal
Destroying their future
If you see in the sky above
The sun is black
You see up there in white
The moon gets red
You fall down on your knees
The earth is gone
So far you will never see it again
They come from darkness
Right into my light
Unknown fields of signs in my mind
They made contact with my conciousness
Told me words of other worlds
Come let us see distance of feelings
Anxious dreams dreams so near I feel full of fear
I tell you about my experience
Trust in your power follow the light
It's so easy to find it around you
Guess where it comes from hold it in your hand
Check up your thinking throw off your doubts
Learn to swim in the sea of confidence
I'm understanding the meaning of the words
They told me when I was young
But the day will come
When the sun is black and the moon is red
The earth is going down

See the day come, thousands of people run
RE-calling former times I know so well
The time is near the light of darkness shines
Till the end of our time from this day
