

Elvis Costello "Night Time"

Visit "[Night Time](#)" on MotoLyrics.com

Wait until the light goes out, I don't wanna be seen
about
Maybe we could find a place to go
Find a crowded place where they don't care about your
face
Or if your name is even Santa Claus or Joe

I'll be right at home if they leave me alone
That's why I only operate at night time

Wait until the clock strikes ten, it'll all start happening
then
Baby, just you wait and see
But we can have a little party, laugh and sing and
everything
I know you'll like it, just you wait and see

Maybe first we'll dig a movie
Then we'll hit the high spots feelin' groovy
That's why I only operate at night time

The right time is the night time
I wait till it's late and I can concentrate
Making love by the light of the moon

So when it's way past nine, get ready for a swinging
time
'Cause I don't know where to draw the line
But we can have a little party, laugh and sing and
everything
I know you'll like it, just you wait and see

Maybe first we'll dig a movie
Then we'll hit the high spots feelin' groovy
That's why I only operate at night time

Night time
Night time
Night time
...
