(words & music by giant - baum - kaye)

I can't conceal the tender feeling

Now that you are close to me

I look at you with tender feeling

And can't help kiss you tenderly

I offer you a true devotion

All life through my love I vow

For this is real, this sweet emotion

This tender feeling I have now

Somehow I knew from the moment our lips first met

You'd be the girl I could never forget

No other love could be appealing

I loved you right from the start

And with each kiss I'll keep revealing

The tender feeling in my heart
