Hey little girl
Hope you guess my name
Let me now
Eliminate myself
Serial victim - a black sheep
Jaded & chronic castaway

Well she is all alone
Absent, alien, frozen heart
Still believes in nothing
In her solid garbage bunker

From the hour zero - damned
Polluted neverland
Yesterday frames - torn apart
I'll paint the sky in dissonance

No good ever comes of this
As I fuck up old fairytales
Intravenous bitter pills
Suck the light out from my eyes

Stripped of all but troubles
Download damaged passion
Razorblade - highway to hell
Suicidal hollow showdown

Hooks in my dried skin
Acrid, dready, dull & tied
Hide'n'seek - playin' dead now
Scavenge silver dazzle

Don't need another devil's advocate
Encouraged doctors
Hope to leave before the dawn
I'd never bite this hand
