Take me to your dark places
Below the paint your secret faces
Together we'll inter the bones
Clandestine shutters overthrown

Never be ashamed my love
All hearts are open graves
All hearts are open graves
Never be ashamed my love
All hearts are open graves

Take me to your dark places
Like an asp I'll suck the traces
Meet you there beneath the crisis
Slowly melt the ancient ices

Never be ashamed my love
All hearts are open graves
All hearts are open graves
Never be ashamed my love
All hearts are open graves

I'll hold you there and stare right in
Unstitch the letter you've sewn within
And in your midnight dress
Blessed nakedness

Never be ashamed my love
All hearts are open graves
All hearts are open graves
Never be ashamed my love
All hearts are open graves

Never be ashamed my love
All hearts are open graves
And no one can be saved
Never be ashamed my love
All hearts are open graves
