Who could send something so pure to lure me away  
I fought the last of my breath  
But you came along on a glorious day  
By the time that you left I was crawling again  
Yeah you came along on a glorious day  
Now I want you to save me again

Ooh ooh ohhh [etc]

The fire that they said would burn just lights up the way  
I lie in the place where I fell  
And three years on this nine day wonder won't go away  
Till you bring an end to my hell

But you came along on a glorious day  
By the time that you left I was crawling again

Yeh you came along on a glorious day  
Now I want you to save me again

Let them all keep their plans  
Cos all I want is in my hands  
And I cant look down  
Back then I had it all, now I want it back that's all  
And I cant get out

Ooh ooh ohhh [etc]

You came along, on a glorious day  
By the time that you left  
I was crawling again  
Yeh you came along on a glorious day  
Now I want you to save me again  
Now I want you to save me again  
Now I want you to save me again
