

Embrace "End Is Near"

Visit "[End Is Near](#)" on MotoLyrics.com

I can't believe it's all the same
I can't believe we fill our lives
With all these trials and errors on our way
But I'll be there, I'll be there

I should have never shown my hand
But look outside and dream it's only
When you look inside you'll understand
And I'll be there, I'll be there

Say the end is near whenever you draw near
The end is near, oh
Say the end is near whenever you draw near
The end is near

The moon will flicker in the sky
Like a film projector I have seen
This scene a hundred million times
But I'll be there, but I'll be there

Say the end is near whenever you draw near
The end is near, oh
Say the end is near whenever you draw near
The end is near

Say the end is near whenever you draw near
The end is near, oh
Say the end is near whenever you draw near
The end is near

Say the end is near
Say the end is near
