Creeping softly into the silence  
as distance echoes all around  
you pound your rhythms in defiance  
with vibrations cascading down

rising quickly, growing hazy  
as the smoke start to reappear  
suddenly it's all driving me crazy  
as I feel the tension getting near

Evening has vibration when, the city streets will ignite,

We're in syncopation, gonna set this whole damned  
town alight  
Though there is temptation and, an appetite to satisfy  
Electric inspiration, boy, is ringing out through the  
night

You see a face like beautiful daylight  
as distance echoes all around  
she moves softly into the silence  
till she's nowhere to be found
