Neurotic nature drives  
To fulfill the karmic destiny  
The greatest human weakness  
Configurates the self-abuse  
The immaculate discipline to  
Influence destiny by proactively  
Paint attractive pictures  
Of a degenerative tendency  
Which makes consciousness predominate  
The irregularities  
Afflicting affects are perfectly personal  
And culminate in the unstructured will  
Human beings manifest their nature  
Through mutual devotion  
Analyzing "revelations" and  
Conceiving new "enlightenments"  
Impede the development of being  
And a state of "oneness with  
The universal law" is prevalent  
Consecrate the development of  
Being and a state of  
"Oneness with the universal law"  
Is impotent self-realization is  
A law not recognized  
Afflicting affects are  
Perfectly impersonal and  
Eliminated in the restructured will  
Ignorance obscures  
The "I" lying dormant  
In the mental continuum  
The ability of subconsciousness  
Processes untainted by karmic  
Accretions to evolve and  
Develop it's potential through  
Experiences removes the veils of distortion  
From the mode of being
