The assertion of confinements with infinite dimensions  
Is the prediction of an artificial universalization  
An Anthro-po-un-logical source of confusion  
The lack of empirical evidence to measure the  
reticence  
Appalling resurgence of purity  
A cycle of imagination that forces to redefine humanity  
An inherit detachment resorts to a vision of decay  
That expels the fusion of selective incentives  
Abating the anxiety of the threatened will  
Transcend the sense of moral indignation  
A failed purgation develops a proliferated threat  
An idiosyncratic theoretical concept is dominant  
Destiny determined - Endemicy preordained  
The underlying confluence of preferences  
Marked by a phenomenal polarisation of societies  
Burdened sufferance a grim heritage for the human  
future  
An uncanny challenge
