Determinating inceptions  
Is beset by cognitive  
Conditions that serve to  
Diminish behavioural acts  
Induce by motives of heredity  
And environment  
Experience reduced to the  
Transcendent conception  
The unconditioned is a mode  
Of exalted cognition  
Which requires conditions  
Compelled to retrace  
An evasive answer to the  
Questions of reason  
By alleging the inability and  
Limitation of the mind  
Withing an imitated  
Artificially constructed illusion  
All sensible intuitions are subject  
To objects of experience  
The challenge is to enter  
This labyrinthine matrix  
Of the sensible impressions  
Without getting lost in  
Dissipation equivalent to  
Produced representations  
The logical consequence of  
The natural  
Propositions  
Exposes the appearance of  
Transcendental judgments  
Restricting it's applications  
In the sphere of experience
