Obscure visual patterns transcend the irrational  
Achievement of the elusive chaos of perception  
Inexorable destabilized by the complexity of events  
Rejection of the self-imposed aspect of limitation  
Disconcerts the inwardly compelling consistency  
To conceive oneself as a static being rather than  
A becoming is a falsification of one's existence  
That's connected with the illusion of an everlasting life  
The ephemerality and accursedness of existence  
Advocates a boundless withdrawal from all  
conventionality  
How meaningless all human aspirations are in a world  
Which is in bondage to falls ideals  
Comprehending impermanence through  
consciousness  
Is the enigma and vexation of ordinary Minds  
A self-asserting individualism originated in pure minds  
Motivated by a pervasive will to power  
Repudiates imposed forms of systematic self-  
alienation  
For all beings suffer the effects of delusion  
Constraint traditions and inherited moralities  
Existence as the imperfect reflection of being  
Unconsciousness and impersonal unmorality  
Therefore it's never an intrinsic part of life's essence  
The perfect culmination of wisdom is a contradiction  
Eternal recurrence the dominant mode of thought  
The more necessary anything appears to the mind  
The more certain it only asserts a limitation
