Lasciviously individualistic incentives  
The sociopathic proliferation  
Chimerical attempts to entice mankind from  
indoctrination  
Manipulating the regenerative process of individuating  
Subliminal suffocation  
Inextricable elements are secretiveness and heinous  
arrogance  
In which lecherous motivations have the upper hand  
To claim discrimination in discriminating ways  
Is clearly an undisputed matter  
Promiscuous mendacity  
The inevitable exclusion of generative patterns  
Marks the degeneration that acts as  
An accepted form of insidious genocide  
To claim discrimination in discriminating ways  
Is clearly an undisputed matter  
Promiscuous mendacity  
Of which it consists evinces the statement  
Internalisation of lechery beyond retrieval  
Segregation of endemic minorities  
Formation of a contemptuously parallel existence  
Transmutes the essence into distinctive behaviour  
Disposal of insolence - justifiable decontamination  
Mimetic conflation
