Like a bolt from the blue
I'm the boy I never knew
Suddenly I hate myself
My band and the whole crew

So I step out for some days
To damn my entire life, oh
I wanna reinvent myself

So recharge the light over my head
This bright white light over my head
That showed me the way
To the other side where I can be myself

I wanna meet me, myself and I
For dinner tonight, we three cool guys
Who are about to find their lives
I see myself giggling with this chick
While me gets drunk with I

So recharge the light over my head
This bright, white light over my head
That showed me the way

After three days Christ is back
Kissed, blessed, glissened
Shining, glamoures and clean
A fresh bulb in the socket

So recharge, so recharge

Please don't burn out
Please don't burn out
Please don't burn out
Please don't burn out
