"What If"

Visit "[What If](#)" on MotoLyrics.com

Here you sit on your high-backed chair
Wonder how the view is from there
I wouldn't know 'cause I like to sit
Upon the floor, yeah upon the floor

If you like we could play a game
Let's pretend that we are the same
But you will have to look much closer
Than you do, closer than you do

And I'm far too tired to stay here anymore
And I don't care what you think anyway
'Cause I think you were wrong about me
Yeah what if you were, what if you were

And what if I'm a snowstorm burning
What if I'm a world unturning
What if I'm an ocean
Far too shallow, much too deep

What if I'm the kindest demon
Something you may not believe in
What if I'm a siren
Singing gentlemen to sleep

I know you've got it figured out
Tell me what I am all about
And I just might learn a thing or two
Hundred about you, maybe about you

I'm the end of your telescope
I don't change just to suit your vision
'Cause I am bound by a fraying rope
Around my hands, tied around my hands

And you close your eyes
When I say I'm breaking free
And put your hands over both your ears
Because you cannot stand to believe I'm not
The perfect girl you thought
Well what have I got to lose

And what if I'm a weeping willow
Laughing tears upon my pillow
What if I'm a socialite
Who wants to be alone

What if I'm a toothless leopard
What if I'm a sheepless shepherd
What if I'm an angel
Without wings to take me home

You don't know me
Never will, never will
I'm outside your picture frame
And the glass is breaking now

You can't see me
Never will, never will
If you're never gonna see

What if I'm a crowded desert
Too much pain with little pleasure
What if I'm the nicest place
You never want to go

What if I don't know who I am
Will that keep us both from trying
To find out and when you have
Be sure to let me know

What if I'm a snowstorm burning
What if I'm a world unturning
What if I'm an ocean
Far too shallow, much too deep

What if I'm the kindest demon
Something you may not believe in
What if I'm a siren
Singing gentlemen to sleep

Sleep
Sleep
