Those famous last words are lying around in tatters  
Sounding absurd whatever i try  
But I Love you, and that's all that really matters  
If this is goodbye if this is goodbye

Bright shining sun, would light up the way before me  
You were the one, made me feel I could fly  
And I love you, whatever is waiting for me  
If this is goodbye if this is goodbye

Who knows howlong we got, or what we're made of  
Who knows if there's a plan or not  
There is our love, I know there is our love

Those famous last words could never tell the story  
Spending unheard and the dark of the sky  
But I love you, and this is our glory  
If this is goodbye, if this goodbye  
If this is goodbye, if this goodbye
